

Amendments to the Claims

This listing of claims will replace all prior listings of claims in the application.

Listing of Claims

1. (Original) A computer system, comprising:
computer hardware including a processor;
an operating system running on the computer hardware;
an application program running on the operating system
and making calls to the operating system; and

a library between the application program and the
operating system, the library including a plurality of
components responsive to function calls from the application
program, and

wherein the library comprises components defined by a
native library associated with the operating system and other
components defined by a special portability library associated
with the application.

2. (Currently Amended) A computer system according to
Claim 1, further comprising a presentation and styling section
which ~~determined~~ determines the appearance of a displayed
output of the application program.

3. (Original) A computer system according to Claim 1, in
which the special portability library includes components from
the following: widget set, window manager, mouse control,
networking, font rendering, bitmap plotting, frame buffer
management, memory management, timers, debug traces, and
images.

4. (New) A computer system according to Claim 1, further
comprising a portability layer which directs the calls to

components of the native library, if such components exist, or otherwise directs the calls to components of the special portability library.
